## PEST RATING ADVISORY

NO. 1-2009

**DATE:** January 30, 2009  
**TO:** All County Agricultural Commissioners  
**FROM:** Plant Health and Pest Prevention Services  
**SUBJECT:** Proposed Rating for *Botrytis hyacinthi*

The Department has determined that *Botrytis hyacinthi* is not a quarantine significant plant pathogen and are therefore proposing to give it a permanent rating of "C".

Scientific and other documentation supporting this proposed rating is available upon request. Per division Policy Letter 89-2, it will become effective 30 days after this posting if no adverse comments are received and there is no formal request to convene a division study team. In the interim, effective immediately, it should be treated as a "C" rated plant pathogen.

If you would like more information regarding this proposal please feel free to contact me.
